

Rotavac Vario Pumping Unit

P/N: 591-00142-00

Fully controllable stand-alone pumping unit including vacuum controller.
For Hei-VAP Core models

- Precise vacuum control avoids bumping and eliminates foaming of your evaporation solution
- Due to automatic vacuum supply to the process parameters you have more time for important laboratory activities

Condenser is not in scope of delivery.

Rotavac Vario Pumping Unit - Technical Data

Weight	6 kg
Diaphragm pump	Three-stage
Suction capacity	1.7 m ³ /h
Ultimate vacuum	5 mbar
Combinable with a condenser	yes
Power input	160 W
Dimensions without condenser (w/d/h)	193 x 299 x 299 mm
